DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Method

Species A: Based on block geometry

Species B: Based on block configuration

Species C: Based on block volume

Second geometry

Species A: Pellet

Species B: Cylinder

Species C: Generally flat shape

Species D: Donut-like (toroidal) shape

Species E: Dumbell shape

Insertion space

Species A: Spinal cage

Species B: Anatomical space

The species are independent or distinct because they represent patentably distinct structural limitations.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
